

SRABON DEBNATH

QA TESTER | MANUAL & AUTOMATION TESTING | COMPUTER SCIENCE GRADUATE | US CITIZEN

Bristow, VA-20136 | SRABONDEBNATH82@GMAIL.COM | (571) 662-9679

SUMMARY

Computer Science graduate with hands-on experience in manual and automated software testing, supported by a strong background in backend development using Java, C, and SQL. Experienced in implementing data structures and algorithms, debugging applications, validating APIs, writing test cases, and tracking defects using tools such as JIRA, Postman, and Selenium. U.S. citizen eligible for security clearance, seeking to contribute to quality-focused, mission-driven teams.

SOFTWARE TESTING & TECHNICAL SKILLS

Software Testing

- Manual Testing
- Test Case Design & Execution
- Functional & Regression Testing
- Smoke & Sanity Testing
- Defect/Bug Lifecycle
- Defect Reporting & Tracking
- SDLC/STLC
- Requirement Analysis
- Verification & Validation
- Flaky Test Identification (Foundational)

Automation & Tools

- Selenium WebDriver
- API Testing (Postman)
- Jira (Defect & Task Tracking)
- Automated Test Execution
- Test Automation Fundamentals
- Git/GitHub
- Linux

Programming & Technical

- JAVA, C, SQL,
- HTML & CSS
- MATLAB
- Data Structure & Algorithms
- Debugging & Log Analysis
- Concurrency Concepts (Foundational)

PROJECT EXPERIENCE

Software Testing & Debugging Project – Flaky Test Analysis | George Mason University (SWE 437)

- Analyzed a flaky software program to identify inconsistent and non-deterministic test failures
- Investigated root causes of flakiness, including timing issues, shared state, and concurrency-related behavior
- Used debugging techniques and log analysis to isolate failure conditions and reproduce issues
- Implemented fixes to stabilize test behavior and verify consistent execution results
- Documented findings and solutions to explain causes of flakiness and corrective actions

Systems Testing & Debugging Project – Distributed Routing Simulation | George Mason University (CS 455)

- Implemented and tested a distributed network routing simulation using Distance Vector Routing (DVR) and Link State Routing (LSR) algorithms
- Designed and executed test scenarios to verify routing table correctness, convergence behavior, and next-hop selection across multiple nodes
- Debugged concurrency, synchronization, and timing issues in a multi-threaded, socket-based environment
- Analyzed logs and program output to detect inconsistencies and validate correct algorithm convergence
- Compared DVR and LSR implementations by measuring convergence rounds, routing stability, and correctness

PROFESSIONAL EXPERIENCE

Front Desk Receptionist

Jan 2019 - June 2025

Wyndham Garden Hotel, Manassas, VA

- Delivered exceptional customer service by greeting guests, addressing inquiries, & resolving issues.
- Handled cash, credit, and other payment transactions accurately and efficiently.
- Managed inventory of front desk supplies & coordinated with other departments to ensure smooth operations.
- Trained and mentored new employees on procedures, customer service standards, and system use.
- Facilitated communication and coordination between management & staff to support daily operations.

EDUCATION

Bachelor of Science in Computer Science JAN 2022 - DEC 2025

George Mason University - Fairfax-VA

Graduated : 2025

Relevant Courses: Software Testing, Data Structures & Algorithms, Algorithm Analysis, Technical Writing, Advanced Mathematics.
